Users

Page: General Shared folders Speed Limits IP Filter

The following IP addresses are not allowed to connect to the server:

*

Exclude the following IPs from the list of disallowed IPs, thus enabling access again:

84.54.180.105

Users

admin

Add Remove Rename Copy

You can both enter individual IP addresses or address ranges in CIDR notation (http://en.wikipedia.org/wiki/CIDR_notation)

By default everyone may connect to the server. You may either block individual IP addresses or address ranges. If you block all addresses, you may allow access for individual addresses or ranges again.

If using groups, the user IP limits don't replace the group IP limits, they only extend the group limits.

Set as home dir

A directory alias will also appear at the specified location. Aliases must contain the full virtual path. Separate multiple aliases for one directory with the pipe character (|).
If using aliases, please avoid cyclic directory structures, it will only confuse FTP clients.
